SIGN COMPANY LLC

Challenge us

WHAT CAN WE DO? IT'S MORE LIKE: WHAT CAN'T WE DO?

After 75 years in the sign business, there's nothing we can't handle at Poblocki Sign Company.

The attractive, durable displays you'll find throughout this catalog are just the beginning. There's virtually no limit to what our veteran staff of designers and fabricators can create. Additionally, our experienced project managers handle every last detail from design concept to installation—on time and on budget. Along the way, we're committed to providing the industry's most responsive customer service.

Since 1932, the talented people of Poblocki have overcome every challenge for our customers. Today, they're the reason we're completely confident when we say: *Challenge us.*

Our state-of-the-art facility

5 GREAT REASONS TO CHOOSE POBLOCKI DISPLAYS

- **Easier Installation:** Low-bid production houses will deliver a display you have to piece together, adding labor costs. We ship our pieces fully factory assembled, so all that's left is mounting.
- **Custom Fit:** Our skilled journeymen will build your display to your exacting specs using only the highest-quality materials. Since we have no standard sizes, and our specialty is unique designs, your product truly will be custom-built by our craftsmen who average 20 years of experience.
- **Greater Durability and Appearance:** Particleboard construction? Low-quality components? Not with Poblocki. Unlike the others, we use solid aluminum frames and aluminum cabinet boxes, 1/4" tempered glass shelving and 1/8"-thick aluminum frame extrusions. Our displays last longer and look better.
- **Stronger Support for Heavier Loads:** The lower-grade hardware our competitors use won't support your more substantial trophies. We use heavy-duty hardware (#83 KV standards and 160 brackets with lever locks), so you can exhibit your wares with confidence.
- **Experience:** Poblocki averages 20 years of experience on the shop floor. Our skilled journeymen have the most advanced technology available, and are cross trained to ensure that they can truly handle the most daunting challenges.

MESSAGE BOARDS

When your message is constantly changing, a Poblocki message board is the perfect, cost-effective option. Our message boards are ideal for schools, churches, small businesses and other organizations. Choose between a single-faced or double-faced board, then add an optional illuminated header with your logo, and finally sit back, relax and let us take care of all the rest.

GENERAL SPECIFICATIONS

PART 1 GENERAL

1.1 SUBMITTALS

A. Product Data:

1. Provisions established within the General and Supplementary Conditions of the Contract, Division 1 General Requirements and the Drawings are collectively applicable to this Section.
 - a. Include material details for each display/postercase specified; aluminum frame, hinged and sliding doors, illumination, and glass shelving.

B. Shop Drawings:

1. Submit shop drawings showing layout, profiles, and product components, including dimensions, anchorage, all details, elevations, plans and sections required to indicate all conditions.

C. Samples:

1. Submit suppliers standard color chart for selection purposes and selected colors for verification purposes.

1.2 QUALITY ASSURANCE

A. Supplier: Obtain all products in this section from a single supplier.

B. Regulatory Requirements: Products shall meet requirements of the Americans with Disabilities Act Accessibility Guidelines (ADAAG) and local amendments and modifications.

C. Installer: Installer specialized and experienced in work similar to that required for this project shall perform Installation.

PART 2 PRODUCTS

2.1 ACCEPTABLE MANUFACTURERS

A. Specifications based on Display/Postercase Series manufactured by Poblocki Sign Company LLC, 800-776-7064, West Allis, WI 53214. Manufacturers' products listed must meet or exceed the specifications approved for this project. Other manufacturers must have a minimum of five years experience manufacturing products that meet or exceed these specifications and comply with Division 1 requirements regarding substitutions.

2.2 MATERIALS AND COMPONENTS

A. Materials and Components

- (1) Aluminum Extrusions: Meeting ASTM B221, alloy 6063-T5.
- (2) Aluminum Panels: Meeting ASTM B209, minimum 0.090" (2.28mm) thick.

2.3 FABRICATION

A. General:

- (1) Comply with requirements indicated for materials, thickness, finishes, colors, designs, shapes, sizes, and details of construction.
- (2) Welded Connections: Comply with AWS standards for recommended practices in shop welding. Provide welds behind finished surfaces without distortion or discoloration of exposed side. Clean exposed welded surfaces of welding flux and dress on exposed and contact surfaces.
- (3) Mill joints to a tight, hairline fit.
- (4) Display/Postercases to be fully factory assembled. No visible fasteners or knocked-down cases will be acceptable.
- (5) Form panels to required size and shape. Comply with requirements indicated for design, dimensions, finish, color, and details of construction.
- (6) Display/Postercases to be fabricated based on dimensions as shown on architectural drawings.
- (7) Coordinate dimensions and attachment methods to produce display panels with closely fitting joints. Align edges and surfaces with one another in the relationship indicated.
- (8) Increase metal thickness or reinforce with concealed stiffeners or backing materials as required to produce surfaces without distortion, buckles, warp, or other surface deformations.
 - a. Fabricate frame from extruded aluminum. Corners to have hairline miters and be braced by means of internal aluminum angles. If welding is necessary, none should be visible. Frames shall have a continuous back-up member behind door.
 - b. Venting: Provide venting as recommended by the manufacture to prevent condensation.
