

POBLOCKI
SIGN COMPANY LLC

Challenge us

FOR YOUR SIGN ORDERS, A HUGE NET SAVINGS IN TIME: **ONLINE SIGN ORDERING SYSTEM**

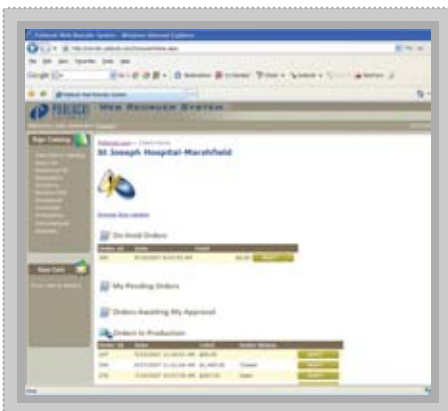

Your signs play a key role in projecting your brand identity and guiding your visitors and employees within your facility. When you need new signs or replacements, you can't afford hassles or delays.

That's why Poblocki Sign Company offers a state-of-the-art Online Sign Ordering System that gives you unprecedented control and expedited processing of any sign in your system you need.

For many of our clients, the only constant is change—change that

requires new signs of all types. Expansions, relocations, reconfigurations and the general evolution of an organization and facility create new needs for signs to meet safety, communication and information requirements. Add that to the already-complex signage challenges of companies with multiple locations.

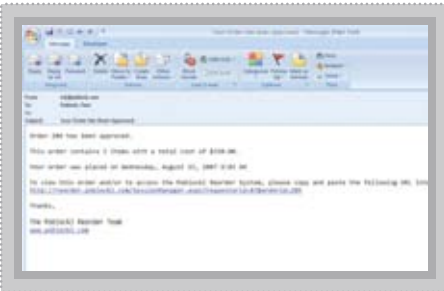

At Poblocki, we've made it simple. Our Online Sign Ordering System organizes your entire signage system into a fast, convenient catalog that's accessible from any Web browser.

HOW IT WORKS

First, our experienced staff will help you plan and implement a successful signage system that gets people where they're going without confusion, complements your facility's architecture, meets ADA requirements, facilitates maintenance and accommodates growth.

After that, our Online Sign Ordering System takes over. Every sign becomes part of your customized online sign catalog. You simply log into a secured site and select the signs you need. You can even track your orders online from start to finish.

SIMPLE, POWERFUL FUNCTIONALITY

Poblocki's Online Sign Ordering System comes with:

- **Complete configuration and training (not that you'll need much).** Our system is easy to use for any level of user, and our Online Order Specialists will work with you to configure your catalog and train you on site.
- **Robust organization capability.** Your catalogs can be categorized by project, facility and sign type. It's up to you how you want it presented. Plus, you have the option of two different user security levels—Requesters and Approvers—to better control spending.
- **Instant Pricing.** No need to wait to have a quote generated for your order. Our online shopping cart will compute your order as you build it. You can even place your order on hold if you want to add signs to the order at a later date.
- **Customizable access and security.** We can set up location-specific catalogs so that your managers in one location go right to the signage that applies to their facility. You can also share catalogs and projects across multiple locations to create purchasing efficiencies.
- **No need for software or downloads.** All you need is a web-browser and access to the Internet.
