**CUSTOM DISPLAY CASE  
CABINETS**

Since 1932, Poblocki Sign Company has created custom display fixtures for some of the most high-end institutions in the nation. Years of experience and research have led to dozens of product lines, but none as groundbreaking as the advANTAGE POINT series.

Typical display cases require unsightly vertical aluminum framing systems that obstruct the view of display contents and limit the size of display case doors. Poblocki's advANTAGE POINT display cases use revolutionary top and bottom door hinging that eliminates all vertical framing and separation, allowing for single glass doors up to 9 feet in height.

## CUSTOM CABINETS AND DOORS

- All displays are available as a complete unit or with the doors sold separately.
- All display case cabinets are constructed with thick aluminum to support the largest glass doors and guaranteed not to warp or sag over time.
- All display cases are customized with sidelights, woods, laminates, and finishes to match the design of your unique facility.

---

## IDEAL FOR ANY APPLICATION

- Units can be recessed, freestanding, or wall mounted.
- The heavy-duty adVANTAGE POINT framing system is perfectly safe for high traffic environments where people will be leaning on the displays.
- Units can be built with rollers and ganging-technology to accommodate traveling exhibits.
- Available for interior or exterior applications.

---

## LARGE SIZES

- Allow for multiple thicknesses based on your requirements.
- Single doors up to 9' high.
- Single display cases as large as 24' in length with proper building access.
